I am a web developer with a strong passion for technology and logical thinking, committed to developing innovative and user-centered solutions. My enthusiasm for technology and analytical skills enable me to efficiently identify complex problems and develop solutions that are both technically sophisticated and user-friendly.

With expertise in HTML, CSS, JavaScript, React, and Node.js, I have refined my abilities through self-directed learning and practical project work. I am motivated to serve as an integral part of a dynamic team, aiming to create complex digital experiences and continually grow.

Professional Experience

- Berliner Verkehrsbetriebe (BVG)** / Automotive Mechatronics Technician
JANUARY 2020 - PRESENT, BERLIN
- Responsible for the diagnosis and repair of electrical systems in vehicles, including the use of various diagnostic tools, programs and documentation.
 - Extensive experience in fault diagnosis and the development of effective solution strategies, supplemented by a deep understanding of complex systems through schematic thinking and thorough evaluation of measurements and fault patterns.
 - Successfully led and mentored apprentices and interns, recognized for high-quality work and positive interactions.
 - Developed and created documentation for optimized repair procedures and improvements, to standardize problem-solving, specifically for certain types of vehicles.
 - Committed to continuous learning through participation in training sessions and self-study to deepen understanding of various vehicle systems.

Projects

Visit my portfolio website at [\[patrick.pavliuchik.com\]](https://patrick.pavliuchik.com) to see a selection of my web development projects.

These include a fully functional web chat application and a custom website for a local trade business.

Additionally, you will find details about the technical challenges of each project, as well as my role within them.
