As a Web Developer with a strong passion for technology and logical thinking, I aspire to positions where I can develop innovative and user-centered solutions.

My self-taught experience with modern technologies such as HTML, CSS, JavaScript, React, and Node.js, complemented by practical projects, highlights my ability for independent learning and problem-solving.

With my professional background that brings a high work ethic and transferable skills such as teamwork and project management, I am eager to establish myself as an integral part of a dynamic development team.

My goal is to continuously learn and grow, aiming to craft complex digital experiences as a Full-Stack Developer.

— Projects —

A selection of my web development projects, demonstrating my skills in various technologies such as React, Next.js, Node.js, and MongoDB, is available on my portfolio website.

These projects include, among others, a dynamic portfolio website, a fully functional web chat application, and a custom website for a local trade business.

Visit [\[patrick.pavliuchik.com\]](#) to learn more about these and other projects, including technical details, my role in each project, and the specific challenges I have overcome.

— Continuing Education and Certifications —

- Mastering TypeScript, Udemy, October 2023, [\[Certificate\]](#)
- The Git & GitHub Bootcamp, Udemy, March 2022, [\[Certificate\]](#)
- The Modern React Bootcamp, Udemy, December 2021, [\[Certificate\]](#)
- The Web Developer Bootcamp, Udemy, May 2021, [\[Certificate\]](#)

Database-Technologies

- MongoDB
- MongoDB Atlas
- Firebase Firestore
- Firebase Realtime DB

Cloud-Service / Hosting

- Firebase
- Cloudinary
- Web Hosting

Tools and Platforms

- Git
- GitHub
- Visual Studio Code
- Figma
- Linux
- Command Line

Languages

- German: Native Language
- English: Proficient

— Professional Experience —

Berliner Verkehrsbetriebe (BVG) / Automotive Mechatronics Technician
JANUARY 2020 - PRESENT, BERLIN

- Responsible for the diagnosis and complex repair of electrical systems in vehicles, including the use of various diagnostic tools and programs.
- Developed and created documentation for optimized repair procedures and improvements, specifically for certain types of vehicles, to standardize problem-solving.
- Formulated solution paths and documentation for the team to ensure consistent repair methods and effective knowledge sharing.
- Successfully led and mentored apprentices and interns, recognized for high-quality work and positive interactions.
- Extensive experience in fault diagnosis and the development of effective solution strategies, supplemented by a deep understanding of complex systems through schematic thinking and thorough evaluation of measurements and fault patterns.
- Comprehensive use of technical documentation and repair manuals, along with quick adaptation to new diagnostic software and tools.
- Committed to continuous learning through participation in training sessions and self-study to deepen understanding of various vehicle systems.

— Education —
